

Resolution
**of the Round table "Interim results of the Finnish-Russian project
KS1877 ImProfEdu "Improving professional education based on the needs of
the labor market in Finland and Russia by using innovative methods and new
technology" within the framework of the 25th Anniversary Forum "Russian
Industrialist"**

Humanity as a whole, including Russian society in particular, will be able to survive only on the path of creating a single cultural and educational space. And in this context, joint international educational projects as a factor of intercultural communication and development play a huge role. Education plays a particularly important role in solving the problems of increasing the human potential of the nation.

Following the results of the work, the participants of the Round Table "Interim results of the Finnish-Russian project KS1877 ImProfEdu "Improving professional education based on the needs of the labor market in Finland and Russia by using innovative methods and new technology" within the framework of the 25th Anniversary Forum "Russian Industrialist" approved the following resolution:

- Approve the interim results of the implementation of the KS1877 ImProfEdu project and note its effectiveness and practical significance.
- To support the further implementation of the KS1877 ImProfEdu project, to harmonize the efforts of Russian and Finnish teachers, students and scientists in the context of more effective use of educational resources of the two countries.
- To support the proposal of the Round Table participants to extend the KS1877 ImProfEdu project in the form of a new project providing for an increase in the number of partners and an expansion of the training program package.
- To recognize that in the modern world, in the context of the formation of the knowledge economy, education is given a new mission as a tool for increasing human potential based on humanitarian values and the widespread use of innovative pedagogical and digital technologies.

The participants of the Round Table express confidence that the exchange of views on topical issues of secondary vocational education, taking into account the needs of the labor market of Russia and Finland in the context of fuller use of educational resources of the two countries, will serve as a constructive basis for the further development of vocational education and the formation of the European cultural and educational space.
